

BIODIESEL ADDITIVES

A range of additives especially formulated to ensure maximum performance from your biodiesel.

C-Boost

Fuel enhancer to improve performance and power by increasing the Cetane rating.

Coldpour

Pour point additive for better performance in cold weather. Reduces clouding and gelling and improves storage and stability.

Defender

Combined antioxidant / biocide to improve storage stability. No organic solvents - environmentally friendly.

Biocide

Controls microbial growth, improves stability and reduces corrosion. Simple to add and can be used in all types of biodiesel.

pH Corrector

An effective low-cost additive specifically designed to cut biodiesel washing costs.

Fuel Clean

For use with B100 blends. contains everything required to maintain quality and stability:

- A detergent for injector cleanliness
- A stabiliser
- A corrosion inhibitor
- A demulsifier to remove water
- An antifoam

Pack sizes

- 20 litre UN Approved drums
- 210 litre UN approved drums
- 1000 litre IBC
- 20,000 litre road tanker

Safety

All products are produced in the UK and are pre-registered for Reach. All products are thoroughly researched and tested. All products are registered under the UK COSHH scheme.
